

# Cyber Command and Control System

## Product Catalog

September 2018

Watchman's *Cyber Command and Control (C3) System* has been designed by experienced Senior SWAT officers to deliver *enhanced situational awareness* for typical tactical deployments. It comprises equipment, options and features not found in traditional video surveillance solutions, with cameras that can be deployed in minutes by non-technical personnel.

The *C3 4-Camera Incident Monitoring System* allows the rapid deployment of up to 4 battery-powered cameras to cover major incidents or public events. It consists of *4 pre-configured Tactical Cameras*, each of which can be quickly deployed using the included Pole, Vehicle, Wall and Window Mount Kits, and a *Mobile Command Console*.

The cameras are securely viewable wherever the Internet is available, on standard mobile or PC equipment, *including officers' personal or standard issue smart phones and tablets*.

The addition of the *Watchman Mobile Command Console* provides a large-screen viewing platform for multi-camera Command and Control of the entire system.

The Command Console also comes with its own high-powered battery system, wireless keyboard, and 500GB SSD Hard Drive for multi-camera local recording. It is totally portable and can be readily operated from the *back of a Patrol Car* or in an integrated *Mobile Command Post* environment.

Item	Qty	Model No.	Complete Systems	Unit Price
<b>C3 4-Camera Incident Response System C3-4IRS</b>	1	C3-1TCS	<b>C3 Tactical Camera Systems</b> <ul style="list-style-type: none"> <li>● 4 x C3 Multi-Mount Tactical Mount Camera</li> <li>● First month data service included for each camera</li> <li>● 1 x Multi-port power charging station</li> <li>● 1 x Ruggedized System Carrying Case</li> </ul>	<b>Kit Price: \$9,900</b>
